2400W Bagless Vacuum Cleaner

This vacuum cleaner is equipped with a robust 2400W motor, providing strong suction for effective dirt removal. The bagless design includes a transparent dust container and a multi-stage filtration system.

Product Overview

High-Performance Cleaning Power

The 2400W Bagless Vacuum Cleaner is engineered for efficient dirt removal and superior suction performance. Designed with a transparent, bagless dust container, it allows for convenient monitoring of fill levels while eliminating the need for replacement bags. With its ergonomic frame and multi-stage filtration system, this appliance is a durable solution for maintaining clean environments by capturing fine dust and allergens effectively.
