# Smart Transmitter Handheld Configurator

This smart transmitter handheld configurator utilizes a high-performance HP Jornada Pocket PC. It integrates a handheld computer and configurator into one device, offering multi-functional display, miniaturization, and a high-performance-to-price ratio.

## Product Overview

### Smart Transmitter Handheld Configurator

This high-performance handheld configurator integrates a powerful Pocket PC with specialized transmitter debugging capabilities. Designed for versatility, it combines industrial configuration tools with personal productivity features, offering a high performance-to-price ratio. It serves as an all-in-one device for field engineers requiring both instrument management and mobile computing tasks.

## Technical Capabilities

### Input Requirements

- Half-width mode only
- Capitalized letters only
- No Chinese character support

### Operational Guidelines

- Press 'Download' button after parameter modification to save
- Wait 2 seconds after 'Download' due to HART communication speed
- Re-enter and re-download if returned parameters are inconsistent

| | |
|---|---|
