Product Overview

Compact Thermoelectric Wine Cooler

This thermoelectric wine cooler is engineered for efficient and quiet temperature management, making it an ideal choice for maintaining optimal wine storage conditions. Its compact design features an integrated temperature control panel and interior lighting, perfectly suited for small-scale professional or personal use. The unit relies on advanced thermoelectric technology to provide stable chilling while minimizing noise and vibration.

Cooling Technology	Thermoelectric
Model Number	YT-C-18B

Key Features

Highlighted Capabilities	Temperature Control Panel, Interior Lighting, Quiet Operation, Compact Design
