Product Overview

High-Performance Agricultural Tire

These agricultural tires are engineered for optimal performance in farming and irrigation applications, offering reliable traction and durability. Designed with an F2 tread pattern, they ensure excellent steering control and stability for tractors and farm implements. Constructed with high-quality materials, these tires provide resistance to wear and tear, making them suitable for demanding agricultural environments.

Technical Specifications

Construction

- Durable rubber compound
- Nylon plies

Available Sizes	10.00-16, 11.00-16
Tread Pattern	F2

Usage & Applications

Suitable Machinery

- Tractors
- Harvesters
- Farm implements
- Agricultural machinery

Key Features

Ribbed tread pattern • Optimal steering • Puncture resistance • Directional control
