Automotive Multimedia Navigation System

This car multimedia navigation system features a color screen with full touch operation and automatic reversing camera support. It includes AV input, high-sensitivity digital FM/AM radio, Bluetooth hands-free calling, and USB media playback.

Overview

Advanced Multimedia Navigation System

This automotive multimedia navigation system offers a comprehensive driving experience with a high-resolution color touchscreen and intuitive touch controls. Designed for seamless integration, it supports automatic reversing camera input, high-sensitivity AM/FM radio, and simultaneous navigation with music playback. With built-in Bluetooth hands-free calling and broad compatibility across dozens of major vehicle models, it is an ideal upgrade for modernizing your vehicle's dashboard.
