Compact Multi-Line Laser Level

This compact laser level is designed for indoor use. It projects one 360° horizontal line and one vertical line.

Overview

Compact Multi-Line Laser Level

This compact 1D 1V multi-line laser level is designed for precise indoor layout tasks, such as hanging pictures, drawings, and room alignment. Featuring a Class II red beam with a 660nm wavelength, it projects one 360° horizontal line and one vertical line for comprehensive coverage. With self-leveling capabilities and a slope locking mode, this device is an essential tool for accurate indoor construction and decoration projects.

Laser Performance

Laser Class

Class II • Red Beam

Wavelength	660 nm
