

0.6L Grind and Brew Coffee Maker

This coffee maker features an integrated grinder, allowing users to brew fresh coffee from beans or pre-ground powder. It has a 0.6L water tank, double overheat protection, and a low-noise grinding mechanism.

Overview

Compact Grind and Brew Solution

This 0.6L coffee maker offers the ultimate flexibility for professional environments or compact kitchens, allowing the use of both fresh coffee beans and pre-ground powder. Engineered with a specialized low-noise construction, it ensures a quiet brewing process with grinding noise levels kept below 75dB. Its elegant, compact design is paired with practical features like a removable water tank and double overheat protection for a safe and premium coffee experience.

Performance & Capacity

The machine features a specialized low-noise construction (<75dB) and supports both coffee beans and powder.
