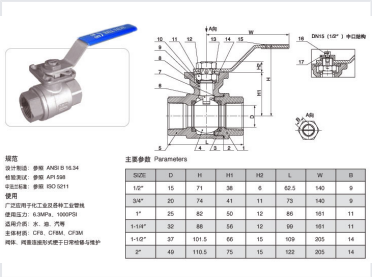
Industrial Ball Valve

This industrial ball valve is designed for use in various chemical and industrial pipelines. It is compliant with ANSI, API, and ISO standards and suitable for water, oil, and gas.



Product Overview

Industrial Ball Valve

This industrial ball valve is engineered for high-performance applications across chemical and industrial pipelines. Designed for versatility, it is suitable for use with water, oil, gas, and various other media. The unit features a robust construction with body options in CF8, CF8M, and CF3M materials, ensuring durability and ease of maintenance.

Technical Standards

Compliance Standards	ANSI B 16.34, API 598, ISO 5211

Performance Metrics

Pressure Rating

6.3 MPa
Pressure

1000 PSI
Pressure

Material & Design

Body Materials

CF8 • CF8M • CF3M

Dimensional Data

Dimensions (mm)

Size	D	H	H1	H2	L	W
1/2"	15	71	38	6	62.5	140
3/4"	20	74	41	11	73	140
