

0.6L Grind and Brew Coffee Maker with LCD Display

This 0.6L grind and brew coffee maker allows users to enjoy freshly ground coffee with ease. It features a special construct to lower the grinding noise and a touch control panel with an LCD display.

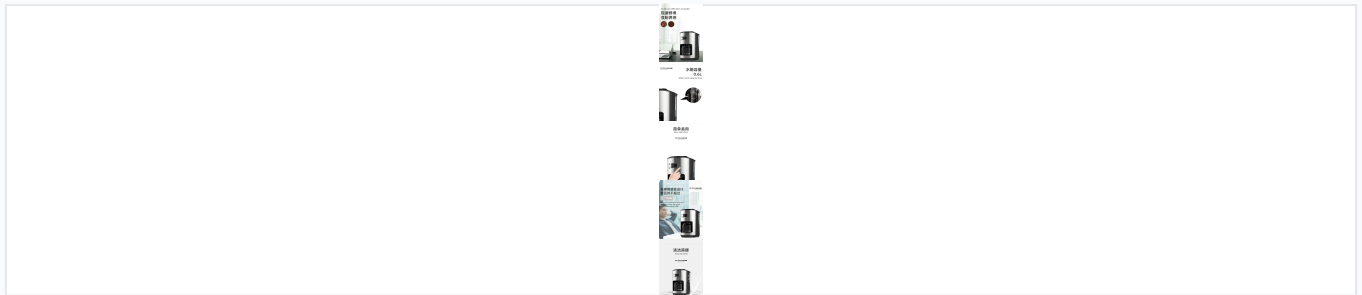

Overview

Compact Grind and Brew Solution

This 0.6L coffee maker offers the ultimate versatility for professional and home environments, supporting both whole coffee beans and pre-ground powder. Designed with a focus on user experience, it features a specialized construction that reduces grinding noise to under 75dB and a modern touch control panel with an LCD display. Its elegant, compact design ensures it fits seamlessly into any space while providing fresh, high-quality coffee with minimal effort.

Key Features

Versatile coffee maker supporting both beans and powder, featuring a low-noise grinding system and easy-to-clean components.
