Industrial Spirit Level with Shock-Absorbing End Caps

This spirit level indicates level and plumb on surfaces. It features shock-absorbing rubber end caps for durability and provides precise measurements for industrial applications.

Product Overview

Industrial Precision Tool

This industrial-grade spirit level is engineered for professionals requiring high precision and durability on the job site. It features a robust design with shock-absorbing end caps that protect the tool from impacts. With a calibrated accuracy of 0.5mm/m, it ensures reliable plumb and level measurements for a wide variety of construction and installation applications.

Technical Specifications

Length	30 cm
Thickness	1.5 mm
