Product Overview

High-Performance Utility Blades

These 0.7mm thick utility blades are engineered for superior cutting precision and durability in demanding professional environments. Utilizing advanced SK2 and SK4 steel with laser-cut edge hardening technology, these blades offer a hardness rating of HRC e 65. With a design that is 20% thicker than standard blades, they provide exceptional longevity and efficiency for heavy-duty applications.

Technical Specifications

Design Features

- Triple ground cutting edge
- Laser-cut edge hardening technology
- 20% thicker than standard blades
- High-durability construction

Thickness	0.7 mm
Material	SK2 Steel, SK4 Steel
Hardness Rating	HRC e 65
