

0.8L Stainless Steel Electric Kettle

This electric kettle is designed for rapid boiling with high efficiency. It features a steam sensor that compensates for altitude and pressure variations, ensuring consistently fresh, 100% boiled water.

Product Overview

High-Efficiency Electric Kettle

The Series-JK297 is a professional-grade 0.8L electric kettle designed for rapid and reliable boiling. It utilizes an advanced steam sensor system that compensates for altitude and pressure, ensuring 100% boiled water every time. With a durable stainless steel body and triple safety protection, it combines high-performance heating with hygienic, odor-free materials for a premium user experience.
