Trouser Loop and Tape Cutting Machine

This machine is suitable for cutting trousers loops, tapes, and sheet metal of copper, aluminum, and wire. It is available in two models: C-11 for small trousers loops and C-150 for large trousers loops.

Product Overview

Versatile Cutting Solution

This industrial cutting machine is engineered for precision and versatility, making it an ideal choice for processing trouser loops, fabric tapes, and various metal sheets. It is capable of handling copper, aluminum, and wire, offering a robust solution for diverse material cutting needs. With two distinct models available, operators can select the configuration that best suits their specific cutting range requirements.

Technical Specifications

Model Specifications

Model	Cutting Range (mm)
C-11	0-110
C-150	0-1500

Performance Highlights

110 mm
Max Range (C-11)

1500 mm
Max Range (C-150)

Material Compatibility	Trouser Loops, Fabric Tapes, Copper Sheets, Aluminum Sheets, Wire
