

1-3 Ton Electric Four-Wheel Forklift

This electric forklift is designed for material handling in industrial and construction environments. Its four-wheel configuration ensures stability and maneuverability, with a lifting capacity ranging from 1 to 3 tons.

Overview

Versatile Material Handling Solution

This electric four-wheel forklift is engineered for efficient material handling in diverse industrial and construction environments. Its robust four-wheel configuration provides superior stability and maneuverability for various load types. Designed for both performance and operator safety, the unit features a protective overhead guard and an emission-free electric powertrain, making it an excellent choice for indoor operations.

Performance

Lifting Capacity

1 ton

Minimum Capacity

3 ton

Maximum Capacity

Technical Specifications

Power Source	Electric
Configuration	Four-wheel

Safety & Design

Safety Features	Overhead Guard, High Visibility Paint
-----------------	---------------------------------------

Operational Environment

Ideal Usage

- Indoor operations
- Industrial settings
- Construction sites
