

1-5kW Home Standby Generator with Outlets

The panel includes two AC 120V 12.5A three-prong wall outlets (standard household 5-20R) and one cigarette-lighter-style 12V DC outlet. Finally, the spark arrestor permits usage in all national parks and forests.

Overview

Reliable Backup Power Solution

This 1-5kW home standby generator is engineered to provide dependable backup power during utility outages. Designed for automatic operation, the unit seamlessly restores power to essential circuits within seconds of a failure. Its compact, weather-resistant enclosure and robust construction ensure longevity and flexible installation options for residential environments.
