Overview

Compact Power and Versatility

This 1 HP direct drive air compressor is a compact, portable solution designed for a variety of inflation and light-duty pneumatic tasks. With a 10-liter tank, it provides consistent air storage to reduce motor cycling frequency, ensuring reliable performance. Its lightweight design and ergonomic handle make it an ideal choice for both professional workshops and home use.

Technical Specifications

Motor Power	1 HP
Tank Capacity	10 L
Drive Type	Direct Drive

Features

Safety Features

- Thermal overload protector
- Pressure gauge
- Adjustable pressure regulator

Certifications	ISO9001
Connection Type	Quick-connect coupler
