

1-Pole 30A 120V AC Electrical Contactor

This 1-pole AC electrical contactor is rated at 30A and 120V. It is designed for definite purpose applications requiring reliable switching.

ADDITIONAL IMAGES

Product Overview

A robust 1-pole, 30A definite purpose AC contactor designed for reliable electrical control.

Definite Purpose AC Contactor

This 1-pole, 30A definite purpose contactor is engineered for reliable switching in commercial HVAC and refrigeration applications. Designed to meet or exceed rigorous electrical and mechanical standards, it provides a high-performance, cost-effective solution for controlling resistive heating, lighting, and motor loads. Its robust construction ensures consistent operation in demanding electrical environments.

Technical Specifications

Pole Configuration	1-Pole
Rated Current	30 FLA
Coil Voltage	120V AC
Operating Temperature	-40°C to +65°C
Termination Type	#10-32 Screw
Contact Material	Silver Cadmium Oxide

Compliance & Standards

Certifications

UL Listed • CE Certified • CSA Certified

Standards Compliance

- EN 60947-4-1:2010+A1:2012
- UL 508 (Industrial Control Equipment)
- CAN/CSA C22.2 No. 14-13

Applications

Common Applications

Air Conditioners, Refrigeration, Resistive Heating, Lighting Systems, Electric Motors
