Product Overview

Compact Versatility

This 1-ton mini excavator is engineered for efficiency in confined spaces, making it an ideal solution for landscaping, agricultural tasks, and municipal construction projects. Its robust hydraulic system and durable track design ensure reliable performance in challenging environments, such as greenhouses or narrow job sites. Whether used for digging, loose soil management, or concrete pavement crushing, this machine delivers consistent power and maneuverability.

Key Specifications

Operating Weight

1 Ton

Operating Weight

Model Identifier

CX10T

Applications

Suitable Applications

Greenhouse Soil Loosening, Campus Greening, Tree Planting, Concrete Pavement Crushing, Sand-Gravel Mixing, Construction in Narrow Spaces

Equipment Features

Standard Attachments

- Digging Bucket
- Dozer Blade
- Auger Attachment

Design Features

Robust Hydraulic System • Durable Tracks • Compact Design • User-Friendly Controls
