

# 1-Ton Electric Chain Hoist with Trolley

This electric chain hoist is designed for lifting applications up to 1 ton. It features a light aluminum alloy shell, an inverse phase sequence protecting device, and an imported FEC80 ultra-treated steel alloy chain.

## Product Overview

### Professional 1-Ton Lifting Solution

This electric chain hoist with trolley is designed for high-performance lifting in demanding environments like goods yards and construction sites. It features a lightweight aluminum alloy shell for durability and an imported FEC80 ultra-treated steel alloy chain for maximum safety. With integrated safety devices and a side magnetic braking system, it provides professional buyers with a reliable and efficient solution for middle-level lifting tasks.

## Key Performance Metrics

### Lifting Capacity

**1 Ton**

Rated Capacity

## Technical Specifications

Drive Type	Hydraulic
Running Mode	Haulage
Type of Work	Middle-Level

## Safety & Construction

### Safety Systems

- Inverse phase sequence protecting device
- Side magnetic braking system
- 24V/36V low voltage control device
- Antiseptic treatment

### Materials & Components

Component	Material/Specification
Shell	Light aluminum alloy
Chain	Imported FEC80 ultra-treated steel alloy
Chain Bag	Light and durable

## Application

### Crane Structure

Hook Crane • All-Terrain Crane

### Primary Application

Goods Yard Crane

## Market Scope

### Available Markets

Global
