

1-Ton Single Axle Farm Trailer

This farm trailer is engineered to meet national standards, making it suitable for transporting materials across agricultural land. Available in both self-discharging and non-self-discharging configurations, it offers dependable quality and ease of maintenance.

Overview

Robust Single Axle Farm Trailer

The 7CX series offers a range of robust single axle trailers designed for agricultural and general-purpose hauling. Featuring a durable steel construction with a protective anti-corrosion coating, these trailers are built for long-lasting performance in demanding environments. Each unit is equipped with a hinged rear gate for efficient loading and unloading, while the single axle design ensures excellent maneuverability and stability across farms and construction sites.
