Overview

Versatile 10-15 CBM Water Sprinkler Truck

This brand new water tanker truck is designed for high-efficiency road cleaning, dust suppression, and landscape irrigation. Built on a robust 4x2 chassis, it features a carbon steel tank with a capacity of 10-15 cubic meters and a powerful pumping system. With a sprinkling width of 12-16 meters and multiple adjustable spray patterns, it is an ideal solution for municipal maintenance and industrial site management.

Key Performance Metrics

Large volume capacity designed for extended operational range.

Performance Highlights

15 CBM

Max Tank Capacity

16 m

Max Sprinkling Width

16000 kg

Gross Vehicle Weight

Chassis & Engine

Robust chassis design suitable for heavy-duty municipal water transportation.

Chassis Specifications

Feature	Details
Drive Type	4x2 (Optional up to 8x6)
Transmission	Manual
Fuel Type	Diesel
Emission Standard	Euro 4
Engine Capacity	< 4L
Wheelbase	3950mm
Number of Axles	2
Tire Configuration	6+1 Spare

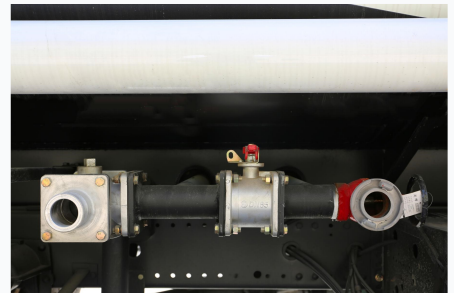

Tank & Spray System

Rear spraying platform with safety markings and high-capacity tank.

Equipped with a high-performance water pump system for efficient distribution.

Standardized DN65 valves for easy connection and operation.

Tank Material	Carbon Steel
Sprinkling Range	16 m
Overall Dimensions	7750 x 2480 x 3100 mm
