

10-30x50 Zoom Binoculars

These binoculars offer a variable zoom range from 10x to 30x magnification, coupled with a 50mm objective lens. They are suitable for long-distance observation, delivering clear and detailed images in outdoor environments.

Overview

Versatile Long-Range Observation

These 10-30x50 zoom binoculars are engineered for high-performance viewing across a wide range of distances. With a variable magnification of 10x to 30x and a large 50mm objective lens, they offer exceptional light-gathering capabilities for clear, detailed images. Designed for rugged outdoor use, these binoculars feature fully coated optics to ensure optimal light transmission and durability in demanding environments.

Technical Specifications

Magnification Range	10x - 30x
Objective Lens Diameter	50 mm

Optical Performance

Optical Coatings	Fully Coated Optics
