

# 10 HP Single-Cylinder Diesel Engine

This single-cylinder diesel engine is air-cooled and delivers 10.0HP. Its direct injection system ensures efficient combustion and reliable performance for power generation and industrial applications.

## ADDITIONAL IMAGES

## Overview

### High-Performance 10 HP Diesel Engine

This 10.0HP single-cylinder diesel engine is engineered for demanding industrial applications, offering a robust and reliable power source. Featuring an air-cooled, 4-stroke design with a direct injection system, it ensures efficient combustion and optimized fuel consumption. Its durable construction and easy-start mechanism make it an ideal choice for power generation, water pumps, and various heavy-duty equipment.

## Performance Metrics

### Key Performance Indicators

**10 HP**

Power Output

**1 Qty**

Cylinders

**4 Cycle**

Stroke

## Technical Specifications

### Fuel Type

Diesel

### Model Number

HM186FE

### Cooling Method

Air-cooled

### Injection Type

Direct Injection

## Applications

### Recommended Applications

- Power Generation
- Water Pumps
- Industrial Equipment
- Heavy-duty Machinery

## Design Features

### Core Features

Easy Start, Low Fuel Consumption, Robust Construction, Reliable Performance

## Engine Components

### Physical Components

- Black muffler with heat warning
- Red cooling fan housing
- Silver engine block
- Electric starter motor
- Fuel injection system
