

10-Inch Adjustable Wrench for Fasteners

This 10-inch adjustable wrench is a versatile hand tool for gripping and turning fasteners. Its adjustable jaw accommodates various sizes, making it suitable for diverse applications.

Product Overview

Professional Grade Adjustable Wrench

This 10-inch adjustable wrench is engineered for precision and durability in demanding work environments. Constructed from heat-treated 45# carbon steel, it offers superior strength and hardness for consistent performance. The precision-machined slide jaw and worm gear mechanism ensure a smooth, exact fit on various fastener sizes, making it an essential tool for maintenance and assembly tasks.

Physical Specifications

Overall Length	250 mm
Max Jaw Capacity	30 mm
Weight	0.42 kg

Material and Build

Finish

Black Oxide (Corrosion Resistant) • Polished Head

Material	45# carbon steel
Construction	Drop forged, Heat-treated

Features

Key Features

- Precision-machined slide jaw
- Smooth worm gear adjustment
- Corrosion-resistant finish
- Integrated hang hole for storage
- Dual clam shell head design
