

10-Inch High-Performance Subwoofer

This high-performance audio component is engineered for deep bass and clear sound reproduction. It features advanced voice coil technology for efficient power handling and minimal distortion.

Product Overview

High-Performance 10-Inch Subwoofer

The 10CJ Subwoofer is a high-performance audio component engineered for deep, impactful bass and clear sound reproduction. Featuring a robust, rigid frame and durable cone construction, it is built to withstand demanding audio environments while maintaining sonic accuracy. With advanced voice coil technology, this unit ensures efficient power handling and minimal distortion, making it an ideal choice for diverse professional audio applications.

Technical Specifications

Driver Size	10 inch
Key Features	High-Performance, Rigid Frame, Advanced Voice Coil, Low-Frequency Response
Installation	Yes
Terminal Type	Clearly marked secure terminals
