

10 kV Outdoor Heat Shrink Cable Termination Kit

This 10 kV outdoor heat shrink cable termination kit is designed for terminating high-voltage cables in outdoor environments. It provides a durable, weatherproof seal, protecting the cable termination from environmental factors and electrical stresses.

Overview

High-Performance 10 kV Outdoor Cable Termination

This heat shrinkable termination kit is engineered for terminating 11kV polymeric insulated cables, including PVC, XLPE, and PE types, in demanding outdoor environments. It provides a durable, weatherproof seal that protects cable ends from environmental factors while ensuring reliable stress control and electrical performance. Designed for easy installation, the kit offers a secure fit and long-term reliability for electric power transmission and distribution systems.

Technical Performance

Voltage Rating

11 kV

Maximum Voltage

Key Features

Reliable Stress Control • Anti-tracking • UV Resistant • Weatherproof • Corrosion Resistant

Material Properties

- Large cross-section range
- Excellent weathering resistance
- Superior electrical and mechanical properties
- High-quality polymeric materials

Application Details

Compatible Cable Insulation	PVC, XLPE, PE
Installation Environment	Outdoor

Kit Contents

Included Components

- Heat shrinkable tubes
- Stress control mastic
- Silicone grease
- Cleaning wipes
- Installation instructions
