

10-Ton Electric Chain Hoist with Forged Hook

This electric chain hoist is equipped with a chain bag and a durable forged hook. Safety features include an emergency stop button and a limit switch, with pendant control for easy operation.

Product Overview

Industrial Electric Chain Hoist

This high-capacity electric chain hoist is engineered for heavy-duty lifting in demanding industrial, construction, and manufacturing environments. It features a robust motor design paired with a carburized, high-strength alloy steel chain for maximum durability. The unit ensures operational safety through a forged hook with a safety latch, mechanical load brake, and integrated overload protection. It is designed to provide precise and reliable performance under heavy loads, complete with a convenient pendant control system.

Performance Specifications

Rated Loading Capacity

10 t

Max Load Capacity

Lifting Speed Range

2.8 - 6.8 m/min

Technical Features

Speed Control	Single Speed, Double Speed
Cooling System	Yes
Chain Material	Carburized high-strength alloy steel

Safety and Components

Integrated Safety Systems

- Mechanical load brake
- Chain gear deceleration system
- Forged hook with safety latch
- Emergency stop functionality
- Overload protection
