Overview

Professional Climbing Work Platform

This Single Mast Climbing Work Platform is a versatile and robust solution designed for construction, maintenance, and inspection tasks at height. With a maximum working height of 100 meters and a 1000 kg rated capacity, it provides a safe, efficient, and stable environment for workers and equipment. The modular design allows for easy site changes without the need for a foundation, making it an essential piece of equipment for modern construction sites.

Performance Specifications

Rated Capacity	1000 kg
Max. Working Height	100 m
Rated Lifting Speed	8.3 m/min
Max. Height of Stand-alone Installation	7.5 m

Platform Dimensions

Platform Width

- Basic: 1.5 m
- Maximum: 2.5 m

Platform Length	8.67 m
-----------------	--------

Technical Details

Standard Section Dimensions	1508 × 500 × 500 mm
-----------------------------	---------------------

Motor & Electrical

Motor Type	YZZ 132 S1-4
Motor Power	5.5 kW
Rated Rotation Speed	1400 r/min
Rated Current	13.5 A

Brake System

Brake Torque	100 N.m
--------------	---------
