

1000-Liter Twin-Shaft Concrete Mixer

The JS1000 concrete mixer is designed for medium to large-scale construction, offering a 1000-liter capacity per batch. It utilizes a twin-shaft mixing system to ensure homogenous mixing of concrete ingredients.

Overview

High-Efficiency Twin-Shaft Mixing

The 1000-Liter Twin-Shaft Concrete Mixer is a robust, industrial-grade machine engineered for medium to large-scale construction projects. Its advanced twin-shaft mixing system ensures thorough and homogenous blending of concrete ingredients for consistent output quality. Designed for durability in demanding environments, it features wear-resistant components and a high-torque motor to maximize productivity and minimize operational downtime.

Technical Specifications

Batch Capacity	1000 L
Mixing Mechanism	Twin-shaft

Features

Key Components

- High-torque motor
- Wear-resistant mixing blades
- User-friendly control panel
- Lifting hopper

Loading System	Lifting hopper
