

1000ft 25-Pair Cat5E Cable 24AWG CCA

This 1000ft Cat5E cable features 25 twisted pairs of 24AWG CCA conductors. It is designed for reliable data transmission in networking applications and supports Gigabit Ethernet speeds.

Product Overview

High-Performance Structured Cabling

This 1000ft Cat5E cable is engineered for reliable data transmission in both residential and commercial structured cabling systems. Featuring 25 twisted pairs of 24AWG solid Copper Clad Aluminum (CCA) conductors, it provides a cost-effective solution for voice, data, and video applications. The cable is designed to support Gigabit Ethernet speeds while maintaining signal integrity, making it an ideal choice for demanding networking environments.

Technical Specifications

Cable Length

1000 ft
Length

Cable Category	Cat5E
Conductor Material	CCA (Copper Clad Aluminum)
Wire Gauge	24AWG
Pair Count	25

Features & Applications

Construction Features

- Solid conductors
- 25 twisted pairs
- Durable outer jacket

Primary Applications	Gigabit Ethernet, Voice, Data, Video, Structured Cabling
