

1000kVA 800kW Containerized Silent Diesel Generator

This 1000kVA/800kW containerized silent generator provides reliable power generation. The self-contained unit integrates a diesel engine and alternator within a soundproofed ISO container for weather protection and easy deployment.

Overview

High-Performance Containerized Power

This 1000kVA containerized silent diesel generator is engineered for reliable power generation in noise-sensitive environments. The unit features a heavy-duty engine design paired with a residential silencer to ensure quiet operation without compromising output. Housed in a robust container, it offers excellent weather protection and ease of deployment for industrial, commercial, and emergency power applications.
