Product Overview

Professional Insulated Box Wrench

This high-voltage insulated box wrench is engineered for safety and performance in electrical environments. Rated for protection up to 1000V, it allows for secure live-use operation. Featuring a durable single-head design, it provides a reliable grip on fasteners, making it an essential tool for professional electricians and technicians.

Technical Specifications

Voltage Rating

1000 V

Insulation Rating

Available Sizes

8-30mm

Wrench Type

Single-head box wrench (plum blossom)

Features & Safety

Ideal Applications

- Electrical maintenance
- Tightening and loosening fasteners
- High-voltage work environments

Safety Features

1000V Insulation, Live-use capable, Non-slip handle
