Product Overview

Professional Insulated Screwdrivers

These 1000V insulated screwdrivers are engineered for safety and precision in electrical environments. Manufactured to meet rigorous international standards, they provide reliable insulation for technicians working on live circuits. Available in a versatile range of sizes from 100mm to 350mm, these tools combine high-quality material construction with ergonomic design for professional use.

Technical Specifications

Voltage Rating	1000 V
Available Lengths	100-350mm
Material	Copper Alloy
Production Method	Casting, Forging
Surface Treatment	Polished, Electrostatic Spraying

Compliance & Standards

Standards Compliance

IEC 60900 • ASTM F1505

Certifications

ISO 9001, UKAS
