Overview

Versatile 100L Chest Freezer

This 100L chest freezer offers dual-temperature functionality, allowing you to switch between refrigeration and freezing modes based on seasonal needs or food storage requirements. Designed with a thick insulation layer and a curved bottom structure, it maximizes internal capacity while maintaining a compact exterior footprint. The unit features a convenient top-door design with adjustable hinges and a user-friendly hidden control panel, making it an efficient and reliable solution for professional storage needs.

Technical Specifications
