

100L Vertical Air Compressor

This vertical air compressor features a 100L tank and a 1.5KW motor. It delivers compressed air at a pressure of 115PSI with an air delivery of 180L/min.

Product Overview

Industrial Vertical Air Compressor

The LVA-55 is a space-saving vertical air compressor designed for efficient and reliable performance in industrial environments. Featuring a 1.5KW motor, this unit delivers a consistent 180L/min air output, making it ideal for operating various pneumatic tools. Its robust vertical design and integrated wheels ensure high portability without sacrificing durability or energy efficiency.
