

100M Digital Laser Distance Meter

This laser distance meter is a precision measuring tool capable of accurately determining distances up to 100 meters. It features multiple measurement modes including direct distance, indirect (Pythagorean) measurement, area, volume, and angle measurement.

Product Overview

Professional Precision Measuring

This 100M Digital Laser Distance Meter is a versatile and robust tool designed for construction, engineering, and interior design professionals. It offers high-accuracy measurements for distance, area, and volume, alongside advanced indirect Pythagorean calculations. With an intuitive interface and a clear, high-contrast black LCD display, it ensures reliable performance in various site conditions.

Technical Specifications

Maximum Measuring Range

100 m

Max Range

Measurement Modes	Distance, Area, Volume, Pythagorean (Indirect), Angle
Display Technology	Black LCD
Minimum Range	0.05 m
