

100mm Electric Angle Grinder

This angle grinder is designed for grinding and cutting various materials. It features a 100mm disc diameter and a no-load speed of 12000 RPM.

Overview

Professional Electric Angle Grinder

This 100mm electric angle grinder is a versatile and powerful tool engineered for efficient grinding and cutting across various materials. With a robust 680W motor and a no-load speed of 12,000 RPM, it delivers high performance for demanding surface preparation and cutting tasks. Designed for reliability and precision, this tool is an essential addition to any professional workshop or industrial toolkit.

Technical Specifications

Rated Input Power	680 W
Rated Voltage	110 V
No-Load Speed	12000 RPM
Max Disc Diameter	100 mm
Hole Diameter of Disc	16 mm
