

# 10.1-inch Fanless Medical Computer with Intel Atom N510

This 10.1-inch fanless medical PC is a reliable computing solution designed for healthcare environments. Powered by an Intel Atom N510 processor, it offers efficient performance and silent operation.

## Overview

### Designed for Healthcare Environments

The 10.1-inch Fanless Medical Computer is a robust and reliable computing solution engineered specifically for clinical settings. Powered by an Intel Atom N510 processor, it delivers efficient performance with low power consumption while maintaining a silent, fanless operation that reduces dust accumulation. Its portable design and versatile connectivity options ensure seamless integration into various medical workflows and networks.
