Product Overview

Smart Fiber Connectivity Solution

This smart fiber network switch is specifically engineered for 10/100M network environments, providing a reliable and efficient foundation for small to medium-sized business infrastructures. It integrates advanced management capabilities, including VLAN support, QoS, and port mirroring, to ensure optimal performance and security across local area networks. Designed for seamless integration, the device supports standard protocols, making it a cost-effective and manageable solution for maintaining high-speed data transmission.

Technical Specifications

Core Features

- VLAN Support
- QoS (Quality of Service)
- Port Mirroring
- Comprehensive network management
- Standard network protocol support

Network Speed

10 Mbps, 100 Mbps

Compliance and Quality

Certifications

CE • ISO • TUV Rheinland • SGS • CCC
