

1050W Electric Garden Tiller

This electric tiller is equipped with a 1050W motor, ideal for cultivating small to medium-sized gardens. It features adjustable tilling depth and width, a lightweight design, and durable steel tines for efficient soil turning.

Product Overview

High-Efficiency Electric Tiller

This 1050W electric garden tiller is engineered for efficient soil cultivation in small to medium-sized gardens. Featuring a robust motor and durable steel tines, it is designed to simplify the preparation of seedbeds and flower beds. Its lightweight, maneuverable design combined with foldable handles ensures both operational ease and convenient storage.
