

108-Key Carbonized Bamboo Keyboard

This keyboard features a full 108-key layout made from carbonized bamboo. It connects via a wired USB interface and offers a visually distinctive and eco-friendly input solution.

Overview

Eco-Friendly Bamboo Keyboard

The KU308-N is a full-size 108-key keyboard crafted entirely from carbonized bamboo, offering a unique aesthetic and tactile typing experience. Designed for users who prioritize sustainability, this keyboard combines natural materials with reliable wired USB connectivity. Its carbonized construction enhances both the durability and the visual appeal, making it a distinctive addition to any professional workspace.
