Overview

Easy wireless installation for versatile outdoor security monitoring.

Solar-Powered Wireless Surveillance

This 1080P security camera provides a comprehensive wireless monitoring solution for both indoor and outdoor environments. Equipped with both 4G cellular and WiFi connectivity, it ensures reliable access even in remote locations. The integrated solar-powered design eliminates the need for external power supplies, while advanced motion detection and smart cloud/SD storage make it an efficient security tool.

Technical Specifications

Video Resolution	1080P
Connectivity	4G LTE, WiFi
Max SD Card Capacity	64 GB
PIR Detection Range	8 m

Features

Key Capabilities

- Solar-powered wireless operation
- Dual mounting: Wall or pole mount
- Day/Night color monitoring
- Motion-activated lighting
- Real-time alarm messaging via app
- Integrated camera and lighting system

Installation Types

Indoor • Outdoor • Wall Mount • Pole Mount
