

# 1080P HD Vehicle Blind Spot Detection Camera

This 1080P HD camera uses AI to detect moving objects in vehicle blind spots. It provides real-time warnings to the driver, helping to avoid collisions with pedestrians, cyclists, and other vehicles.

## ADDITIONAL IMAGES

## Overview

### Advanced Blind Spot Detection

This high-definition 1080P camera utilizes advanced machine vision algorithms to eliminate vehicle blind spots. Designed for safety, it intelligently detects moving objects like pedestrians, cyclists, and other vehicles in real-time. The system provides immediate driver alerts to prevent collisions, making it an essential safety upgrade for buses, trucks, and emergency vehicles.

## Technical Specifications

### Durability Ratings

IP69K Waterproof • ISO16750-3 Vibration Resistant

Resolution	1080P
Video Output	1CH HD analog
Interface Support	USB 2.0, External WIFI

## Features

### Detection Capabilities

- Moving object detection (pedestrians, cyclists, vehicles)
- Real-time blind spot monitoring
- Intelligent collision warning
- Relative speed detection (> 5Km/h)

### Performance Metrics

**5 Km/h**

Min. Detection Speed

## Installation

### Mounting Options

Flexible installation on left and right sides of vehicle

## Compatibility

### System Compatibility

Compatible with HD monitors
