Product Overview

Reliable 10kV Power Distribution

The 10kV Power Cable Distribution and Branch Box is a robust, weatherproof solution engineered for the safe and efficient management of electrical power. Designed for outdoor industrial and commercial environments, this enclosure ensures secure housing for cable connections and branching points. It features a durable, corrosion-resistant exterior, integrated ventilation for thermal management, and a secure locking mechanism to prevent tampering.

Technical Specifications

Voltage Rating

10 kV

Available Models

DF, DFW

Design & Construction

Enclosure Features

- Weatherproof construction
- Hinged lid for easy maintenance
- Integrated ventilation slots
- Locking mechanism for security
- Corrosion-resistant coating

Customization Options

Color is fully customizable to meet specific site requirements.

Safety & Compliance

Safety Features

High-voltage warning signage • Insulated internal components • Tamper-resistant locking
