10kW Air-Cooled Generator Set

This air-cooled generator set provides a 10kW output. It includes a starter switch, oil alert lamp, voltmeter, and breaker.

Overview

High-Performance Air-Cooled Power Solution

This 10kW air-cooled generator set is engineered to provide reliable power for demanding applications. Designed with a focus on efficiency and safety, it features integrated monitoring systems including a voltmeter and oil alert lamp. Its robust construction ensures consistent performance, while the inclusion of both AC and DC outputs offers versatile connectivity for various equipment needs.

Technical Specifications

Rated Power Output

10 kW
Rated Power

Maximum Power Output	11 kW

Electrical Outputs

AC Output	220V
DC Output	12V / 3.3A

Features & Safety

Control Panel Features

- Starter Switch
- Oil Alert Lamp
- Voltmeter
- Breaker

Design Highlights	Air-Cooled, Silent Operation, Oil Level Indicator
