Overview

Compact 10L design ideal for car and home storage of cosmetics and beverages.

Versatile 10L Portable Cooling & Warming Solution

This 10L portable mini fridge is designed for seamless transitions between home and automotive use, making it ideal for storing makeup, beverages, and temperature-sensitive essentials. Featuring advanced semiconductor refrigeration, the unit efficiently cools items to 16-20°C below ambient temperature or warms them up to 60°C. With high-density EPS insulation and dual-power compatibility for AC and DC inputs, this compact unit offers reliability and performance for daily personal or travel needs.

Technical Specifications

Item Number	MFA-10L
Power Input	DC 12V, AC 100V-240V
Power Consumption	48 W
Cooling Performance	16-20°C below ambient temperature
Heating Performance	50-60°C
Cooling Principle	Semiconductor
Insulation Material	High density EPS

Accessories

Included Cables

2 m

Car Charger Cable

1.8 m

Household Cable
