

# 10mm Injection Packer for Concrete Repair

This 10mm injection packer is designed for concrete repair applications. It is compatible with polyurethane, epoxy, and acrylic grouting materials.

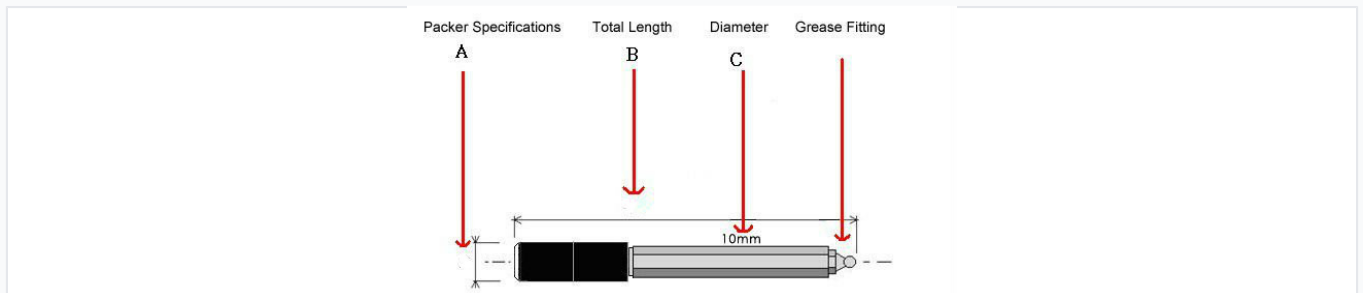

## Product Overview

### Professional Concrete Repair Solution

This 10mm injection packer is a precision-engineered tool designed for high-pressure grouting in concrete repair projects. It is fully compatible with polyurethane, epoxy, and acrylic resins, making it versatile for sealing cracks and restoring structural integrity. Built for durability, it ensures reliable performance in demanding industrial and construction environments.

## Key Dimensions

### Physical Metrics

**10 mm**

Diameter (A)

**100 mm**

Total Length (B)

**10 mm**

Connection (C)

## Technical Specifications

**Diameter (Imperial)**

3/8 inch

**Length (Imperial)**

3.9 inch

**Material**

Stainless Steel

## Application & Compatibility

### Primary Applications

- Crack injection
- Void filling
- Concrete rehabilitation
- Structural sealing

### Compatible Grouting Materials

Polyurethane, Epoxy, Acrylic

## Features

### Durability Characteristics

Corrosion Resistant • Chemical Resistant • High Pressure Ready

### Injection Mechanism

Integrated Grease Fitting
