

10W LED Traffic Signal Light

This 10W LED traffic signal light is engineered for high visibility and energy efficiency. Its durable construction and long-lifespan LEDs ensure reliable performance in diverse traffic management scenarios.

Product Overview

High-Efficiency Traffic Signaling

This 10W LED traffic signal light is engineered for optimal visibility and energy efficiency in demanding traffic control environments. Designed for reliability, the unit features long-lifespan LEDs and durable construction to ensure consistent performance for both drivers and pedestrians. It incorporates standard red, yellow, and green indicators, including directional arrows, to facilitate safe and effective traffic management.

Technical Specifications

Model Numbers

- HPJD300-3-2
- HPFX300-3-3-1

Power Consumption

10 W

Compliance & Logistics

Primary Export Markets

North America • Mid East/Africa • Central/South America • Asia • Western Europe • Australasia

Certifications

CE

Minimum Order Quantity

500 pcs
