

10x25 Camouflage Compact Telescope

This compact telescope features 10x magnification and a 25mm objective lens for clear, bright images. The camouflage finish allows for discreet observation in outdoor environments.

Product Overview

Compact and Durable Design

The 10x25B camouflage telescope is an essential tool for outdoor enthusiasts, combining portability with reliable performance. Its 10x magnification and 25mm objective lens deliver clear and bright imagery for detailed observation. The distinct camouflage finish provides effective concealment in natural settings, making it an ideal choice for hiking, bird watching, and wildlife surveillance.
