

10x25 Compact Binoculars

The telescope can be used for outdoor scenery, animal observation, and also for astronomical observation. These compact binoculars have 10x magnification and 25mm objective lenses and a central focusing mechanism.

Product Overview

Compact Optical Performance

These 10x25 compact binoculars are engineered for versatility, combining high-magnification power with a portable roof prism design. Ideal for bird watching, travel, and various outdoor activities, they deliver clear and bright imagery in a lightweight, durable housing. The intuitive central focusing mechanism allows for rapid adjustments, making them suitable for users of all ages.
